Characteristics and typical fields of application

Seamless basic flux cored wire for single- or multilayer welding of Carbon, Carbon-Manganese steels and similar steels, including fine grain steels with Argon-CO₂ shielding gas or pure CO₂. Main features: excellent weldability in flat and horizontal position, smooth and bright bead, very low spatter losses, easy to remove slag and exceptional mechanical properties even at low temperatures. This wire is especially suitable for welding components of different material or as buffer layer for hardfacing applications.
